

Jamel NEJI is ETP Engineer, PHD of “Ecole Centrale de Paris”, full professor in Civil Engineering at the National school of engineers of Tunis (Tunis el Manar University). He is director of the Civil Engineering department at ENIT and head of the Materials, Optimization and Energy for Sustainability Laboratory (LAMOED).

His activities are focused on valorisation of materials, optimisation of processes and improvement of the mechanic behaviour of structures. He has published papers on a wide range of disciplines, in particular (design of pavement structures; dynamic study of railway structures; cracking of materials; rigidity of composite materials; transport infrastructures).
